SUMMARY

Frontend Engineer with 5+ years of experience specializing in Angular, TypeScript, and modern frontend architecture. Experienced in building scalable enterprise applications from scratch, developing reusable component systems, integrating APIs, and improving application performance. Strong background in Angular, RxJS, NgRx, accessibility standards, and creating maintainable UI solutions for production environments.

TECHNICAL SKILLS

Frontend: Angular (v8-v19), TypeScript, JavaScript, RxJS, NgRx, React, Next.js
Angular: Standalone Components, Lazy Loading, Reactive Forms, Routing, Guards, Interceptors, Change Detection
UI Development: HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, AG Grid, Responsive Design
API Integration: REST APIs, GraphQL, HttpClient, JWT, OAuth 2.0
Testing: Jasmine, Karma, Jest, Cypress, Playwright
Accessibility: WCAG 2.1 AA, Lighthouse, axe DevTools
Backend: Node.js, C, .NET Core, SQL Server, MySQL
Tools: Git, GitHub Actions, Jenkins, Docker, Kubernetes, AWS, CI/CD

EXPERIENCE

Software Engineer *Blackstraw AI*

May 2026 – Present
Remote

- Building frontend applications from scratch using Angular and TypeScript with focus on scalable architecture and reusable components.
- Developing enterprise UI features by creating Angular components, services, routing workflows, and responsive user interfaces.
- Working with Angular best practices including RxJS, reactive programming, lifecycle optimization, and performance improvements.
- Collaborating with backend engineers and product teams to integrate APIs and deliver complete end-to-end application features.
- Creating reusable frontend patterns and UI components to improve maintainability and development efficiency.
- Debugging application issues, improving stability, and enhancing overall user experience.

Software Engineer (Contract) *Fusion Health*

Feb 2026 – Apr 2026
Woodbridge, NJ

- Worked on Angular UI improvements focused on accessibility, usability, and performance within healthcare applications.
- Resolved WCAG 2.1 accessibility issues including keyboard navigation, focus handling, and screen reader support using axe DevTools and Lighthouse.
- Improved Angular application performance by optimizing component rendering and reducing unnecessary UI updates.
- Fixed responsive UI issues across browsers and devices to provide consistent user experiences.
- Collaborated with UX and backend teams to deliver accessible and scalable Angular solutions.

Software Engineer *Kiswe*

Sep 2024 – Jan 2026
Summit, NJ

- Built Angular applications using standalone components, lazy loading, and OnPush change detection.
- Used RxJS to manage complex asynchronous workflows and improve application reliability.
- Developed reusable Angular components and shared UI libraries used across multiple teams.
- Implemented NgRx state management patterns for scalable frontend applications.

- Improved application performance through optimization techniques including lazy loading and efficient rendering.

Software Engineer

Jul 2022 – Sep 2024

Gensler

Morristown, NJ

- Developed Angular enterprise applications and dashboards supporting internal business workflows.
- Built Angular reactive forms, routing workflows, and state management solutions using NgRx.
- Integrated Angular applications with .NET Core APIs including authentication and error handling.
- Implemented JWT and OAuth 2.0 authentication using Angular interceptors.
- Improved large dataset rendering performance using AG Grid optimization techniques.

Frontend Engineer

May 2021 – Apr 2022

Cigna Express Scripts

Franklin Lakes, NJ

- Developed frontend applications focused on UI logic, API integration, and performance improvements.
- Integrated REST APIs with secure authentication workflows using JWT and OAuth 2.0.
- Optimized complex UI flows through improved component design and state management.
- Created automated tests using Jest and Cypress.

Frontend Engineer

Sep 2020 – May 2021

Atmiya Care Charity

Parsippany, NJ

- Built responsive Angular and React applications using reusable component architecture.
- Created shared frontend utilities and components to improve development consistency.
- Integrated REST APIs to automate workflows.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions.

EDUCATION

Bachelor of Science, Computer Science

Montclair State University

Montclair, NJ
