Professional Summary

Frontend Engineer with 5+ years of experience building scalable, high-performance, and accessible web applications. Skilled in React, Angular, Next.js, TypeScript, and modern frontend frameworks. Experienced in integrating REST and GraphQL APIs, optimizing complex UI workflows, implementing CI/CD pipelines, automated testing, and accessibility compliance. Collaborative team player focused on delivering user-friendly, maintainable software solutions across multiple projects.

Technical Skills

Frontend: React.js, Next.js, Angular, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Styled Components, CSS Modules, Bootstrap, Responsive/Adaptive Design, Webpack, Vite, Babel, React Hooks, Figma

Backend / API: Node.js, Java, Spring Boot, REST, GraphQL, JSON, JWT, OAuth, CORS, API Security, Caching, Logging

Testing: Jest, React Testing Library, Cypress, Playwright, Unit/Integration/E2E Testing, Test Automation

Database: MySQL, PostgreSQL, MongoDB, Redis, SQL, Schema Design, Advanced Queries

DevOps / Tools: Git, GitHub Actions, Jenkins, Docker, AWS, CI/CD Pipelines, Performance Monitoring, ESLint, Prettier

Concepts: Accessibility (WCAG 2.1 AA), Frontend Performance Optimization, Frontend Security, Agile/SCRUM, Client-Side Debugging, OOP, Design Patterns

Professional Experience

Software Engineer — Fusion Health, NJ

Feb 2026 – Present

- Developed web application features using Angular v19 and legacy versions, creating reusable, accessible UI components with optimized rendering for multiple devices and browsers.
- Conducted comprehensive accessibility audits, identified WCAG 2.1 AA compliance gaps, and implemented remediation strategies to improve usability for all users.
- Integrated REST and GraphQL APIs for dynamic, data-driven workflows, including secure state management and error handling across multiple modules.
- Implemented responsive and interactive UI elements, leveraging Angular directives, services, and reactive forms to enhance user engagement.
- Maintained Dockerized development, testing, and deployment pipelines to ensure consistent application builds and smooth CI/CD workflows.

Senior Frontend Engineer — Kiswe, Summit, NJ

Sep 2024 – Jan 2026

- Developed high-traffic single-page applications using React, Vue, TypeScript, and Tailwind CSS with optimized component architecture for scalability and maintainability.

- Integrated RESTful and GraphQL APIs with client-side caching and state management, reducing frontend errors by 30% and improving application responsiveness.
- Applied code splitting, lazy loading, and tree-shaking techniques to improve load times and runtime performance of large-scale applications.
- Conducted code reviews, debugged complex frontend issues, and shared best practices with team members to improve maintainability and collaboration.
- Ensured cross-device compatibility and WCAG-compliant accessibility, improving user experience and adoption rates.

Senior Frontend Engineer — Gensler, Morristown, NJ

Jul 2022 – Sep 2024

- Built enterprise-grade UI components and dashboards using React, Angular, Vue, Next.js, and Styled Components for high-profile client projects.
- Integrated REST and GraphQL APIs with asynchronous data handling to support dynamic content updates and interactive features.
- Conducted code reviews, refactored legacy code, and debugged frontend performance issues to improve maintainability and reliability.
- Developed automated unit, integration, and UI tests using Jest, React Testing Library, and Playwright to ensure high-quality releases.
- Collaborated with designers and project managers to translate Figma mockups into responsive, accessible, production-ready interfaces.

Frontend Engineer — Cigna Express Scripts, Franklin Lakes, NJ

May 2021 – Apr 2022

- Developed interactive checkout workflows using React, TypeScript, HTML5, and CSS3, improving task completion efficiency by 25%.
- Integrated secure REST APIs with JWT/OAuth for safe frontend-backend communication, including error handling and validation.
- Implemented modular components, optimized client-side rendering, and reduced page load times by 40%.
- Wrote unit, integration, and end-to-end automated tests to maintain consistent application quality and stability.
- Collaborated with cross-functional teams to deliver responsive, accessible, and consistent UI across multiple projects.

Frontend Engineer — Atmiya Care Charity, Parsippany, NJ

Sep 2020 – May 2021

- Delivered responsive, WCAG-compliant web applications using React, HTML, CSS, and JavaScript to improve accessibility and usability.
- Built reusable components and modular UI patterns to ensure maintainability across multiple pages and projects.
- Integrated RESTful APIs to dynamically render content and improve client-side workflows and data consistency.
- Participated in Agile/SCRUM sprints, collaborated on code reviews, and contributed to technical documentation.

- Ensured cross-browser and device compatibility while implementing performance optimizations and accessibility improvements.

Education

Bachelor of Science in Computer Science, Montclair State University, Montclair, NJ, 2016 – 2020
